How to submit articles

The quality of the material we can publish in Dragon User is much more up to a very good standard than the quality of the (micro)files that you can make with your Dragon. The Dragon computer was designed to do this, with a powerful software of Basic, but with very poor documentation.

Articles which are submitted to Dragon User for publication should not be more than 1000 words long. All submissions should be typed. Please leave wide margins and a double space between each line. Programs should, wherever possible, be compiled printed on plain white paper and be accompanied by a copy of the program.

We cannot guarantee to return every submitted article or program to its sender as a copy. If you want to have your program returned you must include a stamped addressed envelope.

## Editorial

EUROCARD, the Spanish company which bought the rights to manufacture the Dragon, has appointed North London-based Compuserve as the UK distributors for the new, Spanish-built Dragons.

Edoardo Merigo, President of Eurocard SA, has gone on record as saying that he sees the future role of the Dragon as primarily an educational and small-business machine.

Ted Orychael of Compuserve endorses that view. He said that his company will not be importing the Dragon 32, and instead will be pushing the Dragon 64 with disk drives as an entry level business machine. His view is that the Dragon is dead as a games machine.

Compuserve is lobbying Eurocard for the development of a new generation of Dragon machines and peripherals, based towards the business and home applications market.

Eurocard's plans for the future include a 128K machine, networking, and hard disks, all of which seems aimed more at the serious rather than the games side.

On the other hand, while software for the Dragon has been harder to find in the shops in the last six months, there are plenty of games on the multi-ender market, as a browse through the advertisements in Dragon User will show.

Some companies have moved into the Dragon market after Dragon Data got into trouble — Incentive, for example, did well with Backtrack, and has just converted its best-selling adventure, the Ket Trilogy.

Eurocard and Compuserve may be right. Perhaps the future for Dragon lies in the small business market. But on the other hand, there do seem to be large numbers of existing Dragon owners who want games. Eurocard should be careful about being over-zealous in the attempt to move the Dragon up-market. A substantial potential customer base could quite easily be alienated by bold statements concerning the death of the Dragon games market.

# Letters

This is the chance to air your views — lend your tips, compliments and complaints to Letters Page, Dragon User, 18-19 Little Newport Street, London W1CH 7PP.

## On your uppers

IN REPLY to Mr Harrington's letter for an alternative method for switching between upper case and lower case letters, the answer is quite simple. "SHIFT+Q" (not SHIFT+Q!) alters the alpha lock flag at address \$149 which normally contains the default setting BFF for upper case letters. To enter lower case from a program, all you need to do is clear the flag using either CLR \$149 or assembly language or POREM484 or BASIC. I suggest that you enter lower case mode at the beginning of the program and then use the SHIFT key for upper case letters.

I K Barker

## How to boot the Exec

THE FOLLOWING may be of interest to DRAGON USER readers who use Dragon 484. Although it is easy to boot from 32K mode to 64K mode by pressing "EXEC" (executing no program) it is more to reverse back to 32K mode again. This is probably not real problem but it does mean that disk drive owners cannot make use of the extra memory and save their programs to disk (they either use a tape or do their programming in 32K mode). The following routine may therefore be useful as it allows a "Reverse Boot" to be made in from 64 to 32 mode without loss of the basic program in memory.

Obviously the size of the program must not be larger than the memory available in 32K mode but large basic programs (that contain a POLEARN) or large arrays which would normally give an O/E error in 32K mode can now be loaded (loaded into 64K mode run (and edited if necessary) then transferred back to 32K mode for saving to disk.

First a short in-code routine

must be saved on a disk (or tape) and kept for whenever the Reverse Boot is needed. This can be done using the following basic program.

```
TO FOR I = 40000 TO 40000
  &POKE 48
  30 POKE I/VALI 40 + 400
  40 NEXT
  50 DATA 48:1000:80:PO:30
  200
  60 DATA 10:40:0:0:0:0:0:0
```

After entering type (RUN) then save the resulting re-code to disk using

```
SAVE REVERSE BOOT
```

```
40000:40000:40000
```

To go to 32 mode from 64 simply type POKE 110:0 and press reset (this will produce the familiar DRAGON copy right screen (this with the disk concerning - REVERSE BOOT in the drive) type RUN REVERSE BOOT and the original basic program that existed at 64K mode will be restored.

## Dragonquest query

I RECENTLY acquired a Dragon 484 in full we received three of them.

Our problem is that none of us can solve the Dragon Quest that came with it. We have had quite a number of people try the game but none of us can quite solve it.

If you could possibly give us some clue (please don't say "try restarting things") I would be greatly appreciated.

The game is called Dragon-

quest and if anyone has any ideas on how to find the (secret) the full the story of the shield or what to use the (secret) we would really like to know.

Sad Thyrng

USA

## Dump to printer

I READ with interest Alan Wiggins's article in the February issue of Dragon User about dumping the high resolution screen on an Epson printer.

I have a KDC PT-2001 printer that is very similar to the Epson so I entered the program, only to find that it would not work.

Upon closer inspection I found the bug due to the program using the 6502 instructions which my printer does not use.

I then set about modifying the program so that it would work with my printer and I thought other readers with similar printers may be interested in these modified files.

Add the following as type at the beginning of the program stored at location 1655

```
07 1F F4:30:40:30
```

Change these locations to

```
7F10 80
7F1F 1A
7F20 80
7F21 1E
7F22 80
7F23 8F
7F24 30
7F25 80
7F26 80
7F27 80
```

The program also starts at location 32441 (7804 hex) so when CLEARING space for it the program is now CLEAR 320 32340. When using the program the message is now

```
CSAVEM "PROGRAM"
32441,32767:32340
The routine is called in the same way as before, ie
PMD004-1:32340:0
EXEC32004:0
```

## Flights of fancy?

BRANCA/CADDOE's flight simulator issues limited two minutes points on the T47 simulator.

As the flight progresses the computer memory is gradually used up until the game crashes with an O/E (ERROR) or at least runs down. On take off PRINT MEM - around 4000 and after a long flight PRINT MEM - around 100 to 200, hence the error message. The flight can be continued (copying the information with a CORD) when PRINT MEM - 4000 again (but this is not what should occur in a 32-65 game).

Secondly you can program a fly by terrain, as no fuel gauge is included (but using Basic it is not too difficult to add the gauge to the engine on/off and throttle control program lines). I've done this and labelled the larger data with their initials which does improve the screen display somewhat.

Now help required. Does anyone know the memory locations concerning the number of lives in Code Golf? were a 32 screen Fantasy Flight? I can't get beyond the first few or six screens with five lives given. Otherwise it is an excellent game. Also I have a story of quest and concerning The Ring of Gannet - said anyone who has become fairly expert at this would care to contact me. (postage would be returned along with my thanks and a list of queries).

# SIMPLY

The best value for money software  
you will ever buy for your  
**DRAGON 32**...and that's not just our opinion...  
9 superb full length games  
on one cassette  
for only **£3.95**

## How to

After downloading these games  
simply fit the tape to your Dragon 32  
and insert the cassette. The games  
will then be loaded into your  
memory. When the games are loaded  
you can start playing. The games  
are: 1. The 11th Hour 2. The 12th  
Hour 3. The 13th Hour 4. The 14th  
Hour 5. The 15th Hour 6. The 16th  
Hour 7. The 17th Hour 8. The 18th  
Hour 9. The 19th Hour. They are  
all very easy to play.

I want to thank you for making  
this software available to me. It is  
a pleasure to be able to play these  
games on my Dragon 32.

Yours sincerely  
Mr J. Smith  
123 Street  
Birmingham

### 1. THE 11TH HOUR

The 11th Hour is a game of strategy and tactics. You are a general in a war against a powerful enemy. You must use your wits and your army to win. The game is played on a grid and you can move your army around the grid. You can also attack the enemy's army. The game is very challenging and you will need to think carefully about your moves.

### 2. THE 12TH HOUR

The 12th Hour is a game of strategy and tactics. You are a general in a war against a powerful enemy. You must use your wits and your army to win. The game is played on a grid and you can move your army around the grid. You can also attack the enemy's army. The game is very challenging and you will need to think carefully about your moves.

### 3. THE 13TH HOUR

The 13th Hour is a game of strategy and tactics. You are a general in a war against a powerful enemy. You must use your wits and your army to win. The game is played on a grid and you can move your army around the grid. You can also attack the enemy's army. The game is very challenging and you will need to think carefully about your moves.

### 4. THE 14TH HOUR

The 14th Hour is a game of strategy and tactics. You are a general in a war against a powerful enemy. You must use your wits and your army to win. The game is played on a grid and you can move your army around the grid. You can also attack the enemy's army. The game is very challenging and you will need to think carefully about your moves.

### 5. THE 15TH HOUR

The 15th Hour is a game of strategy and tactics. You are a general in a war against a powerful enemy. You must use your wits and your army to win. The game is played on a grid and you can move your army around the grid. You can also attack the enemy's army. The game is very challenging and you will need to think carefully about your moves.

# Eurohard — plans for the Dragon

THE DRAGON 32 is sold in the UK, but not in Europe.

That is the message from Eurohard, the Spanish company which bought the rights to manufacture the Dragon and CompuShare, the North London company expected to distribute Spanish Dragons in the UK.

According to Juan Carlos Montero, Eurohard's Head of PR and International Relations, the 32 will be made in Spain, unchanged from the original Welsh machine.

But Ted Opyrchal of CompuShare confirmed that the 32 will not be imported into Britain. The Dragon 32 is still being sold in Spain, but it is not their proclaimed machine, he said.

Eurohard will also be continuing to sell the Dragon 16, both in its original form, and as a redesigned case with a new Spanish keyboard. There may also be keyboards for other languages.

The new version of the 64 will be renamed the Dragon 800, according to Senior Montero.

Eurohard has a prototype of the 800, and may be showing it at the 1988 Show.

CompuShare is committed to selling the Dragon 64 as an

Ted Opyrchal of CompuShare, an early level business machine owner. Ted Opyrchal

'It is our total intention to push the 64 with disk drives. The only way forward for Dragon in the country is in a new version and

Eurohard will not be manufacturing printers. Instead it is looking for an externally bought printer will be marketed under the Dragon trademark.

Eurohard will be manufacturing a cassette recorder for use with the Dragon, named as the Spanish home market.

64K disk drives are being designed, with a 320K capacity. They will be compatible with the 32, the 64 and the 800, and have an official launch date of June.

Eurohard also has a 286 open disk system in development, which should be ready by the end of April.

CompuShare is unlikely to import the quick disk, however.

'I have my doubts about the applicability of this machine in the British market. Ted Opyrchal says.

According to Senior Montero, the sales of the Dragon in Spain are going very well. In the last three months of 1987 Eurohard sold 20,000 units, he claimed.

The Christmas campaign was a little smaller than envisaged but that affected sales across the board in Spain, not only the Dragon, he says.

January and February were slower, but that was expected. Eurohard is apparently planning a new marketing tactic in Spain — close to door sales of the Dragon.

Ted Opyrchal appears to believe that a 128K machine is the profile, probably using OAS Level Two as an operating system.

Towards the end of the year, some fairly attractive systems should be produced, especially if Eurohard put in the networking system, he says.

## Football crazy

ADDICTIVE Games has just converted its best selling title Football Manager for the Dragon.

Kevin Toms, who runs Addictive, was responsible for the conversion, and the program includes all the features which have made Football Manager number one in the charts across all makes of PCs.

On the Dragon, Football Manager sells for £5.95.

Addictive Games Ltd at 76 Richmond Hill, Burnhamouth, Dorset DT2 0HC.

## Vidipix

VIDIPIX is a new company with two games for the Dragon, Jaguar and Combat Air Patrol. The Dorset based company also makes Dragon peripherals to order.

Jaguar comes with four different screen pictures which are randomly distributed into 162 different square blocks. The objective is to recreate the picture.

Combat Air patrol is a light simulator, with three separate sections. The first involves combat with other aircraft, then comes on to air refuelling, and finally landing.

Both games cost £3.95.

Vidipix will distribute a game for freebies to order. Called the Postoffice it changes to Comshare port to an RS232C printer interface. Full version versions may be available later. Postoffice costs around £25.00.

Vidipix is at 425 Occupation Road, Dorset, Northants NN17 1LQ.

## Dark Star

DESIGN DESIGN has just launched a commission of Dark Star for the Dragon.

Dark Star is a space combat

**DARK  
STAR**

*Design Design*

game played on a 16 by 16 grid. Each square is a section of a galaxy, and contains a certain number of energy forces, fuel pods and such. Also debris about the galactic grid and various planets controlled by the forces of an evil empire.

The player's objective is to get through to each planet, destroy the planetary defences, and liberate the oppressed world. Only after freeing every planet in the galaxy from the yoke of oppression is victory achieved.

Dark Star will cost £7.95. For more information contact Design Design, 2 Ashton Way, East Hoxington, Sunderland SRS 3FX.

## Mail box

MAILBOX is a new program from Hounslow based Hams Micro Software for the Dragon 32bit with Dragonoids.

Following the success of the company's personal accounts program, Moneybox Mailbox is a name and address database program on a 42 column by 24 line screen.

It allows the user to store names and addresses with short notes or flags attached. The program can sort files and printing those with certain flags, for example.

Also included are routines for merging and purging files. Mailbox comes on a Dragon disk at £14.95. For further information contact Hams Micro Software, 49 Alexander Road, Hounslow, Middlesex TW2 4NP.

## FLEX IS BEST

Of all the operating systems available on the DRAGON — FLEX is the only one to give you ALL of the following

- 48K Bytes Free User RAM
- 51 by 24 character Hi-Res Screen
- Supports up to four disk drives, Single/Double Sided — 40/80 Track — Single/Double Density
- Huge Choice of Available Software from Numerous Suppliers
- Compatibility with most DRAGON 16 BASIC and Machine Code software
- Fully Supported and Maintained in the UK
- Available for the DRAGON or DELTA Controller (and TANDY COLOUR)
- Reliable, Friendly and Easy to Use

### FLEX

For DRAGON or DELTA disk systems

with Editor and Assembler **£80 00**

special price with DRAGON **£20 00**

available and easy to use operating

system. It is the ideal operating system

for the DRAGON — especially when

combined with our BASIC package

Requires: DRAGON with disk, Power

■ 48K Bytes FREE USER RAM

■ 51 by 24-Hi-Res Screen with true

low-level (Autoscroll) refresh-rate

character sets (windows etc)

■ Supports single and double density

for interchange with other FLEX

systems

■ Includes over 30 standard utilities

■ Powerful In-line Assembler

■ Versatile Text Editor

### RMS

**£80 00**

A complete DATABASE  
MANAGEMENT SYSTEM

Versatile and very easy to learn to use  
ideal for accounting, business records  
management information systems,  
customer records, purchased data entry  
stock control and much more. RMS can  
be readily configured to do many  
different jobs which require data entry  
online data retrieval, updating and printing  
of reports without any programming  
knowledge. An RMS database is stored  
as a standard FLEX random file and is  
accessible to user written programs.

### FLEX UTILITIES

**£20 00**

An invaluable collection of useful  
utilities for FLEX including DEMO  
MODIFICATION, SOURCE DISCUSSION  
improved file copy, single sector copy  
rotating file, better CMT, change  
memory and 16 memory, auto battery  
file, graphics dump, R5252 terminal  
interface — and more

### DBASIC

**£20 00**

Disk BASIC for FLEX. Get all the  
benefits of FLEX and run existing  
DRAGON programs with little or no  
changes

■ Standard 32K DRAGON BASIC

■ 32 by 16 Screen and 51 by 24 Screen

■ Send Commands to FLEX from

BASIC

■ Use up to 4 sequential or random

access files simultaneously

■ ERROR GO TO statements to

interrupt errors

■ ERROR continuation allows you

exactly where BASIC directed an

error

■ Load Save programs as FLEX disk

files

■ Includes 8 example programs

## Scrabbling for points

**Program:** Linkword: Data Computers, Inc. PO Box 318, Saxon, NY 12150-0318.  
**Price:** \$25.00 each

DO WANT an eye for the tower or good on TV after having seen it in true shape and get on the big screen is often something of a disappointment. This game is true of versions of real games mimicked by computer. Linkword and Data are cases in point.

Linkword is a computerized Scrabble. Data is an excellent

nothing that cannot be had from a \$25.00 real scrabble.

There is no scoreable word yet which would denote the words you are allowed to use (obviously for reasons of money) and no check, a made to allow illegal moves (a new word not connecting with any already on the board for example). The game does not allow a delay so that opponents can object to a move however.

Linkword seems to be an excellent program with much enjoyment to be had from it — but it is not a push-over for the real thing.

My device about Data is much the same. A ho-

low the speed of the program is OK, and the players can have some fun. The situation involved in aiming a shot amount to much more than could ever be simulated in a program.

Once again Computers has produced some excellent coding, increasing the in-

terest of the Dragon in all respects. But the games themselves are not quite what I like for the real thing.

Mike Harrison

## Joust a minute

**Program:** Sky-Joust: J. Morrison, 400 N. 1st St., Garden City, NY 11530-1400.  
**Price:** \$25.00

SKY JOUST is loosely based on the ancient game Joust. The game involves controlling your Joust in a duel against other Joust snakes and snakes using your laser lance to cut them. Failing to kill birds will result in them landing and laying eggs which eventually hatch and even more snakes.

The game begins with just one bird to kill and becomes

progressively harder as you continue with a total of three different screens. Period 3 graphics are used and are quite impressive but by no means the best that J. Morrison has produced and again from the music on the title screen the sound effects are unimpressive.

The best thing about this game is its price — just \$25.00. The software is not as sophisticated as other versions such as Blockbuster that by Morrison and is therefore not as effective.

Steve Gader

## Blockbuster quiz

**Program:** Blockbuster Computers, Inc. PO Box 318, Saxon, NY 12150-0318.  
**Price:** \$25.00

WHEN Charades and Postman's Pals have worn a bit thin over time and you've put off that week you were going to take, the family might turn to a quiz for some competitive entertainment.

They could do worse than play Blockbuster, which follows the style of the TV game of the same name. The idea is to guess answers, beginning with a given letter and trace a route from one side of the screen to the other.

Computers present the quiz in an efficient and compelling way. Just as in the TV game, you may try to guess the answer before the quiz for is complete — but something like, well, W is the opposite of, can leave you in a mess. If you are wrong, your opponent gets the full quiz too. A seven-line also applies.

The data is cleverly ordered such that even at completing a round the same questions do not come up again. There are 500 questions altogether to keep you going.

If your general knowledge needs more or you are a quiz fan, this could be the one for you.

Mike Harrison

In real Scrabble you make your own destiny — you choose the letters you try to outguess your opponent. The factor which gives most satisfaction in this game is physically handling the letters arranging and rearranging them on your hands. Keeping the score also gives little Johnny something to do between fixtures.

How much of this is denied to players of Linkword? You letters are chosen by the computer and displayed on the screen for all to see. Your score is automatically added to your total and the scores and high letter and word squares are automatically accounted for.

Now all of this does add up to some real programming. Letters can be played on the multi-colored board as a color and options exist for players to exchange any number of letters for others as seen in the pool. End-game tactics are strong.

Even so, all of this adds

resolution dart board is all the more of a cross between Jody Williams and a Dart which might aim is under your control. The lights of the selected dart is shown and as the point on the target shows up as a dot.

The hardest part of playing real darts — the subtraction — is taken care of by the computer.

The on-screen player can be involved in any part of the screen for better trajectory. The normal rules for darts are adhered to including the need to end on a double or bull's eye.

The PMODE 4 graphics are

# CUMANA Special Price Offer!

## DOUBLE DENSITY DISK INTERFACE FOR THE DRAGON 32/64 FROM CUMANA

Dragon owners take full advantage of the speed, convenience and reliability of Cumana's 5 1/4" or 3 1/2" floppy disk drive systems (storage capacities of up to 1.6MB). Cumana are now offering 4 complete systems which come complete with a double density disk interface for the 32/64.

### SYSTEM OFFER 1:

Double density interface with Cumana's 5 1/4" DS 250 single drive  
**£189.95**

### SYSTEM OFFER 2:

Double density interface with Cumana's 5 1/4" DD 500 dual drive  
**£304.95**

### SYSTEM OFFER 3:

Double density interface with Cumana's 3 1/2" DS 315  
**£199.95**

### SYSTEM OFFER 4:

Double density interface with Cumana's 3 1/2" DD 352 dual drive  
**£289.95**

Limited offer, all products are subject to availability.  
All prices are inclusive of VAT. Delivery extra £4.00

## SYZYGY

**NEW FROM MICRODEAL**  
**DRAGON 32/64**

You can depend on Syzygy as one of the best programs you have already had and have total encounter with. Vector and another could prove disastrous. He is somewhere nearby guiding the control computer which just happens to have some information essential to your survival. To have any chance that you must find and retrieve your light sabre, presently being guarded by one of Vader's huge ugly slaves. Syzygy is just so much to do - over 200 different graphics, 60 levels and 300 locations make this our best ever graphical adventure. 1 joystick required for light sabre fight. 64 different commands, 100% machine code. High Res graphic 24 Pin & Packing Slip **£8.00**

**NEW FROM MICRODEAL**  
**DRAGON 32/64 & TANDY COLOUR 32K**

## SPEEDRACER

Alan & Constance 64 games, not just racing - this has got to be the best Grand Prix game ever! Full colour, super smooth scrolling, superb graphics, and loads of action. With over 4 circuits to choose from a 1/4 change if they burn their tyres out, too many 'plugs' in a corner or burn the gas in order to qualify. Its fast and very very good. 1 joystick required. **TANDY COLOUR**

WORKING ONLY AVAILABLE FROM TANDY STORES

Pin & Packing Slip **Tape £8.00**

**SMASH HIT FROM MICRODEAL**

## Mr. DIG

**DRAGON 32 ATARI 32K & COMMODORE 64 TANDY COLOUR 32K**

Everybody's favourite MR DIG must dig for the hidden food supplies in the MEANIES territory below the ground. He dig dig dig can eat chocolate or touch the MEANIES with a spoon. Special levels give MR DIG extra points and a magic power GPH can tell the MEANIES.

Full colour 32Kline graphics 1 joystick required

Tandy Colour version available from

**MICROMAIL. Tape £8**

**NEW FROM PCKET NEWS Software**

## PIT FIEND

You are stranded on the middle floor of a five storey maze and your task is to find the piece of a broken clock, which are shown around the room. Dig & flip open 100 pages there are pit fiends offer you that touch from which a fatal and also there is a limited supply of eggs in a limited game.

# Correcting the faults and problems with Dragondos

*P G Scott solves the problems that face unwary users of Dragon DOS*

FOR SOME TIME it has been known that there are a number of faults and problems associated with DRAGONDOS 1.0 over and above the documentation. This article is intended to identify and highlight some of these problems and propose solutions (which have been running successfully on my own system). While I do not advocate "patching" copied code, in the interim without the source, there is no alternative.

The rest of the article has been separated into three areas:

**Faults**, where the system performs erroneously and it is not possible to overcome the error without manual assistance.

**Problems**, where it is possible to program around the problem or there is need of information not provided in the manual, and

**Lack of information**, where facilities exist that are not documented.

In what follows, a single sentence description of the error is given followed by explanation of the cause and effects of the error together with a simple test if applicable. And a patch to correct the error. Within the patches, the format is:

+nnnn py zz

where + nnnn is the location address in the EPROM and corresponds to run-time address 00C000+00000 and py zz are the Hex values to be programmed into consecutive locations.

## FAULTS

**Fault 1: USR000 address is corrupted and Drive 4 is not set to "unused" at RESET.**

These two faults have no apparent link, but are actually caused by a single erroneous byte in the RESET initialization sequence. As a result of the error, any attempt to use the USR000 function before setting the address will cause program corruption rather than "PC error", while a change of disk format, from single sided to double sided (or vice versa) will not be detected for drive 4, but will for the other drives (see notes).

It is not possible to issue commands to correct this fault, but it requires the single

POKE \$E804 0: DEF USR000=00000

to be played after EVERY reset.

Test: A=USR000(A)

Patch: +0000

**Fault 2: System "beeps" if in graphics mode and drive not ready**

This error occurs because the system tests for graphics mode (for some un known reason) and if not waits for an interrupt which cannot occur. This can be avoided by ensuring a disk is always available when in graphics mode.

Test: SCREEN 1,1 : DR

Patch: +0000 01

+0000 01

**Fault 3: Directory track 18 update fails — results are not predictable.**

After writing to disk, directory track 18 has to be updated to match track 20. The effect of this fault is that a failure when reading track 20 or writing track 18 will cause the processor to return to a random address as the disk is not read properly. This can only be fully overcome by applying the suggested patch.

Test: POKE \$B800,1 : EXEC \$MGT34

with a) no disk, and b) disk with file protected

Patch: +0070 00 01

+0000 0F 00 40

+00A0 00 40

**Fault 4: Track 18 sector 26 is corrupted when files are listed**

This fault is only encountered when using double-sided 50 track disks. Directory sectors 1 and 2 contain a bit map showing whether a disk sector is in use or free. When a file using sectors on tracks 40 to 79 is killed, the sectors allocated to it are returned for re-use, but track 18 sector 26 is written instead of track 20 sector 2. This can only be corrected by applying the patch.

Test: DIR, CREATE "FILE", 000000  
FULL, FILE DAT : DIR

Patch: +1000 01

**Fault 5: File name validation fails in the BASIC error routine.**

This error only affects machine code users as calling the file specification validation routine will exit to BASIC if a "PC error" occurs, instead of returning the

error code to the B accumulator. One method of using this and the other 17 routines available to machine code users will need to be the subject of a later article. This is only correctable by applying the patch.

Patch: +0000 00 04 01 04 00 04

00 00 00 00

**Fault 6: BASIC file protection and rename routines addressed instead of the machine code routines.**

This error only affects machine code users, as the routines referenced in BASIC, DRAGONDOS 1.0 use the "character genre" routine at \$0000 to get a file specification and return to BASIC, a file protection or rename sub-routine. The routines that are called by the BASIC commands and should be called from machine code can be used by making the change desired.

Patch: +001C 00 00 0F

**Fault 7: Errors in loading a disk buffer cause routine effects.**

As there are only four disk buffers available, accessing more than four files requires these buffers to be re-allocated. This fault occurs when writing to a file to free a disk buffer for re-use. If a failure occurs the stack is not reset properly and the command returns to a random address. Only patching the EPROM will correct the fault.

Patch: +1000 27 00 07 01

**Fault 8: Only five files may be opened by a BASIC program.**

The manual states that 10 files may be open at one time, clearly in conflict with the actual situation, it is caused by allocating file control blocks to "BASIC" files (whether a "BASIC" file is created or not) and not freeing them when no longer required.

Without a re-write of DOS it is not possible to totally eliminate this fault, but the patch described will allow 10 files to be added (note that "KILL" as "PHO" TESTING a file counts as a file release, while "CREATING" a file with backup counts as two file releases).

This patch also has the effect of removing any damage return from the end of the DRAGONDOS sign-on message, in order to gain sufficient space in the EPROM.

Test: FOR I=1 TO 10 : PRINT I

CREATE "FILE" : CHRS

# What's your best source of information on color computing?

# HOT CoCo

Now you can improve your color computing skills and it's easy to do. HOT CoCo gives you more practical information on the Dragon<sup>®</sup> than any other publication. Nearly 150 pages a month!

Every issue is packed with exciting new things for you to do. We won't waste your time with filler stories. You'll get instructive columns:

- Home's Arcade**—enjoy old-fashioned arcade style games on your computer
- The Basic Book**—learn everything you need to program in Basic
- The Educated Guest**—discover how to use your computer as a teaching tool
- Doctor ASCII**—get answers to your technical questions
- Graphically Speaking**—create eye-catching designs that add appeal to your programs

You also get a dozen easy-to-understand articles every month. Games, utilities, programming techniques, tutorials, graphics, education, hardware projects. They'll help you expand what you can do. And complete program listings show you how to use what you learn.

That's not all. HOT CoCo saves you money too.

- Cashful reviews** help you make every purchase a sound investment.
- Informative ads** let you compare shop from home.
- New product announcements** tell you what's available before it reaches the store.

With all this at your fingertips, your subscription could pay for itself with one wise purchase.

And HOT CoCo is risk-free. If you don't like your first issue, just write "cancel" across the invoice and return it to us. You won't owe a thing.

Subscribe to HOT CoCo today. Twelve big issues are only \$14.50 (US funds drawn on a US bank). Simply fill out the coupon below and return it right now to: HOT CoCo Subscription Dept., PO Box 915, Farmingdale, NY 11737, USA.

Dragon is a registered trademark of Dragon Data Ltd.

**YES! Help me improve my computing skills. Send me 12 issues of HOT CoCo for \$14.50 (US). I understand that with payment enclosed or credit card order I will receive a FREE issue, making a total of 13 issues for \$14.50 (US).**

Get a 13th issue FREE when you make payment or charge it on your Mastercard, Visa, or American Express.

# DRAGON OPEN FILE

Send us your Dragon programs, beginning with a general description and then explaining how the program is constructed. Take care that the listings are all bug-free, enclosing a cassette and, if possible, a printout. We pay £5 for each original bug-free program published, double for the program of the month. If you have any problems with the listings, please send your queries to the appropriate editor, Dragon User, 10-12 Little Newport Street, London WC2R 3PP.

## Flash

Robert Ashley Watson

THE FOLLOWING Z80-type machine code program gives the Dragon 30 an extra command to flash certain words (40) on the screen at a certain speed over while the Dragon is doing something else.

To use the routine type in the BASIC listing—being one. If the data statements have been entered correctly then the program should be saved on cassette. If the message (ERROR IN DATA appears then the data should be re-checked and Run again.

The machine code is saved on cassette with

COAYON FLASH 32000,32000,32000  
EXEC should then be typed to initiate the new command. The new command which is created is PRINTP. Note that there is no space between the PRINT and the P. To use the command see the examples below.

PRINTP(500) "test"  
This would flash the word test on the screen at position 500. The PRINTP has the same features as the PRINT command except that it flashes characters on the screen. If you wish to use the normal PRINT command and you wish to print the variable P then there must be a space between the PRINT and the P for example PRINT P.

Location 37050 is the flash rate. This is the number of interrupts which will occur between each flash and is a number between 1 and 555. As 50 interrupts occur every second then POKÉ 37050,55 would give flash every half second. To stop the flashing type POKÉ 37050,0.

As in the following example  
10 PRINTP "press enter to continue"  
20 INPUT AS  
30 POKÉ 37050,12,0

This example will cause the message to flash on the screen until ENTER is pressed, then the message would stop flashing.

Listing 2 shows the assembly listing of the program and may be typed in if you have an assembler.

# Ket Trilogy Special Offer

The Mountains of Ket, The Temple of Vires, and The Final Mission form the Ket Trilogy, one of the classic adventure series.

Previously only available for the Spectrum, Incentive Software has now converted the trilogy for the Dragon. On one tape, all three programs are £9.95.

Now Incentive, in conjunction with Dragon User, offers readers the chance to buy the Ket Trilogy for only £8.95 — that's a saving of £1.00 off the recommended price.

Just fill in the attached coupon and send your cheque in postal order, made payable to Incentive Software, to the address given.

This is a special limited offer, and all coupons must be received by June 30.

## Payment Method

- ☐ I enclose a cheque payable to Incentive Software
- ☐ I enclose a postal order payable to Incentive Software

# GO SUB DRAGON USER

Don't lose out — make sure you receive the next twelve issues of your favourite microcomputer magazine by sending away for a year (or two years) subscription today. Just complete this special subscription order form now, and send it with your cheque or postal order to our subscription department.

And if you subscribe for two years, you can claim a free book. Choose from any one of these superb Sunshine microcomputer books — *The Working Dragon 32*, *Dragon 32 Games Master*, *The Dragon Trainer*, *Advanced Sound and Graphics for the Dragon computer* or *Artificial Intelligence on the Dragon computer*.

## FREE BOOK CLAIM FOR 2 YEAR SUBSCRIPTIONS

☐ I claim my free book (title)

### Subscription type

- ☐ 1 year at £10 UK
- ☐ 2 years at £20 UK  
plus free book
- ☐ 1 year at £20.00 US/Canada (airpost)
- ☐ 2 years at £40.00 US/Canada (airpost)  
plus free book
- ☐ 1 year at £18 First of World surface
- ☐ 2 years at £32 First of World surface  
plus free book

Other overseas annual rates available on request.

## Dishwasher

[illegible]

This global program is one of several I have initiated in the public space. I began this close

with protected with a label over this side. With this utility you can run through a patch all new discs in a few minutes.

```

10  '***** BASIC FORMATTER *****'
20  '***** FOR DRAGONFLY *****'
30  ' HAVE ON DISC AND FIT WRITE '
40  ' PROTECT LABEL FOR PERMENT '
50  ' ACCIDENTAL DEFAUSE '
60  '*****'
70  '
80  '
90  PRINT "THIS UTILITY WILL MAKE THE
100 DISC"
110 PRINT "CLEAN, SO MAKE SURE YOU
120 HAVE"
130 PRINT "THE RIGHT DISC INSERTED."
140 PRINT "OK, MAKE YOU REMOVE
150 THE UTILITY DISC."
160 GOTO 100

```

```

340 PRINT "ARE YOU SURE?"
350 IF ANSWER IS "Y" THEN
360 PRINT
370 PRINT "O.K. HERE GOES."
380 SOUND 1,1,40
390 CLS
400 PRINT "I HOPE YOU HAD THE RIGHT
410"
420 PRINT "BECAUSE NOW IT IS CLEAN!"
430 PRINT
440 PRINT "DO YOU WANT TO DO ANOTHER
450"
460 IF ANSWER
470 IF "Y" THEN
480 IF "Y" THEN
490 GOTO 340

```

## Dump

© 2006 The Authors  
Journal compilation © 2006 Blackwell Publishing Ltd

22 The program is written the screen dump is in single density mode. Change line 50 to the following for double density.

58 PRINTE-2 CHRS. (27)  
CHRS 1, CHRS (HOF) CHRS (HOF-5).  
Bibliography in studies of music. See 100

Before starting the program, LISTING 1 in the screen dumps and LISTING 2 is an example of the simple routine which when executed will avoid the high res screen. This is useful if you want a "bugger" of the screen. To use the dump just load a game or screen you like, press break (your picture will still be in memory), then type in LISTING 1 and run it. The program will show you the screen as it dumps, be warned the program is fairly close-to-the-edge in its double density so go off and have a good rest.

1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 26

**LISTING 2** and run it. The code is now in `main.c`, so just type `EXERCISE2` to run the code.

A point to note — due to the printer's error a "T" is used in place of the variable  $t$  in the last line.

If any readers would like to experiment, line 40 controls the position of the dump on your paper. Line 135 controls the "Y" depth of the dump. Interesting results are obtained when loading a profile 3 screen and calling up profile 4 before dumping the screen. This is because of line 70 which checks to see if it is not a new call.

ANDERSEN, IN 1988

# MIKE GERRARDS ADVENTURE TRAIL

LOTS of letters are now coming every month, and it is a surprising to discover how geographically wide the Dragon user base is. Why only this month I received a letter from The Olive Nebula, which the post mark suggests is just outside Motherwell. Does the UFO know something Frank Moore doesn't? Three correspondents from Orkney offer advice on El Dabbers such as making regular use of the words **REMEMBER**, **OHAM** and **HYWAE**, and they're seeking advice on Escape From Pouter 7. Next time you write the Nebula is why not call it on the Grid at Psychodelta and no chutes?

Moving slightly nearer home, Laurel Depard of El van Havin Maris, 80080 Juxtares, France needs some help on *Return of the King*, but has just completed *El Dabbers*, so if you want to trade clues write to Laurel who sends very funny letters. He wonders if anyone is still sane after playing The Goodwood Incident and his English is so good I think he must have secretly acquired a Gaelic lilt from some other adventure.

Bob Bernacconi of 16 Woodland View, Laurel Bottom, Cornwall PL33 9HD asked me how to get rid of that tapping noise in Sharnagard, and I advised him to try **RECHMAHS** (not **SHIMPORD**) (not the old backwards if you want to know the answer). Bob also wants some general tactical advice on *Ring of Darkness* to anyone who can shed some light on finding Shads gal m'french, but do send a stamped addressed envelope if you're writing to anyone whose address I include, especially if you're asking for advice.

That certainly applies if you're writing to Jane and Ken Kennedy, who seem to have completed every known Dragon adventure and some unknown ones besides.

We consider *El Dabbers* quite kind of words the best adventures that we have played so far for the Dragon. They say I can't share their enthusiasm for the latter but everyone in their opinion, and they are kindly offering to help anyone out of sticky corners in the likes of the Franklin Trilogy, *Keys of the Wizard*, *Death Mines of Suez*, *Crimus* and *Wizards*. No room to let all the letters, but whatever you want help on you can always write to me and I'm unable to assist you myself I shall refer to my ever increasing list of addresses (don't tell the editor, but I'm doing it on a Commodore 64, so I can have

both the database and the Dragon working at the same time). Maximilian Jane and Ken's address is 6 Portland Row, Edinburgh. Phone 0641 943.

There's rather a sorry letter from Miran Cienry of Belgoyan, New-Mile-House, Cancon-on-Sue, Co Tipperary, Eire, who's finding it very hard to track down Dragon adventures over there in Eire, with shops weeding down their stocks. Miran's also stuck in *Crimus* block so if you can help with some equipment, or maybe would like to swap some adventures if you're finished with them, then Ken's your man.

A tip from Mark Gadsby of Painsborough on Death Mines of Suez: the arcade adventure combination box Phoenix. If you can't get through the arcade game to discover the winning code to the adventure, then don't type **CLUGAD** but instead **SHIFF** or **CLUGAD** or and that's it! The adventure passed through the door and let clues for the adventer. And all given from John Martin of Painsborough. Before you EXEC any machine code adventures type **MOTORON** **AUDITION** and adventure away to your favourite music. Yes play Madness when playing *Madness* and the *Musique* or Black Sabbath with *Black Sabbath*. Any other suggestions?

I'll have to live with the first two letters, or I'll have to make it up myself the new Scott Adams. Help on *El Dabbers* offered by John Brown, 72 Manor Drive, North New Milton, Surrey GU15 2SR, and by Peter Ward, 7 Selwyn Way, Lanchbury, Birmingham. H. Dawson and help's waited

on that one by Helen Johnstone, 46 Chalfont Drive, Rushmore Park, Ipswich Suffolk IP4 6AP. David Haines of Stafford and Paul Edwards of Manchester both passed Ken Kabin, the author of *El Dabbers*, and if you haven't tried it yet then *Monobots* are now selling it at only 50p (plus 50p postage), having taken over Dorian Dorian's stock of the game. A real bargain that.

More letters next time, but now to Scott Adams and the treasure in his series of adventures. The *Somerset of Calymongue Castle* at 27 66 from *Adventure International*. The Dragon version is well used, and looks just as that. Scott doesn't get in for giving descriptions, but he does go in for putting puzzles, and great inducing puns. You take the role of a certain character, an apprentice sorcerer, and your task is to retrieve 10 Spheres of Power from the Castle, for reasons I've no time to go into here.

I am in a field as the first best description and you can see a most centre and vivid description. No good adventure should go anywhere without an *INVENTION* and this shows up to be holding up sports of Fire Seed, Light Squared, Yaho, Light/Hope and the Wizard Queens' Sport. One of these will get you into the castle with a terrible pun and while you'll find a courtyard containing a Mage's Pavilion. Getting on to the next I took into the fountain and behind I saw a Silver Treasure number one. I thought, but soon after I was seeing what to where it is in the fountain makes you feel a little odd. I'll get into I decided fighting pun with pun and calling my love open to I made the fountain's contents. No, don't I think. No star either.

Off the courtyard is a balcony containing a chandelier and the end of a piece of rope. All right, I'm a sucker for anything *UNITE* *ROPE*. Kenneth's descending chandelier and one deceased inventory. I bet the chandelier has an another star too. Scott Adams' advice again, and here's another essential addition to the collection. *Adventure International* is converting Scott's other letters for the Dragon at the moment, which is marvellous news, but I can't see the bottom of the page looking as I'd better stop. After all, we have to get the magazine together and send it all into way to the Olive Nebula, just outside Motherwell, don't we?

## Arrays game

I AM trying to write a program that consists of three different formulas that can be written about 30 different ways. You will find a small subroutine that I have enclosed.

```
10 CLG
20 F0R4=1T00
30 REAC4S(4)
40 ACAT4
50 DATA=80R4 2-B 2Y
60 DATA4=5R4
70+3 1401160
75 DATA=53-B
80 F0R4=1T00
90 PRIN4S(4) NEXT4
100 LGT
```

I am putting them in to an array and then calling them up when the program needs them. The way the program can grow. My problem is how can I get the program to work with a variable that has come from an array? The program is starting out working but big problems with the enclosed amount of information available is it 40(7) or 100(4) (44-4-40) and A and B have been deleted then if you say A=40(7) all that happens is that either X becomes 40(1) or an error will be prompted. Am I asking too much of my machine?

J R Griffin  
1 Gavran Rd  
Barnes St  
Sough  
Barnes

YOU ARE not asking too much of the Dragon, but to achieve the result you want, you need to use the DIFF and STAGE and STAGE then assigning a formula to a string, use the command DIFF PR4G(4)=80R4 2-B 2Y.

When you want to get the result, use R-PR4G(4). You can also substitute a value for X in both the DIFF and STAGE and the STAGE stage. The function name can be any normal variable name up to two characters long.

## A Basic problem

I HAVE two questions for you. When I type EXEC 3444 why does a 'T' appear below it?

When I type EXEC 3444 why does a 'T' appear below it? In 80(2)?  
Duncan Chambers  
30 Park Avenue  
Southfields  
Tfms and Wms NCM 80(2)

EXEC 3444 is part of the Basic Input routine, the part that prints the 'T' character and accepts a line of characters into the buffer. It is of no use from Basic as an 80(2) error will be generated when you press Enter.

EXEC 3444 is a routine which prints 'T' of where 'T' is the current line number — this is set to 80(2) in direct mode. This subroutine is part of the error reporting routine.

It is generally not a good idea to call routines such as these from Basic, as you might end up losing your program!

## Lost for words

I HAVE some queries concerning the Dragon 64 and hope that you can help.

1) Why is it that when trying to use SPELLCHECK, I consistently get an error message when the program checks the Supplementary Dictionary?

2) How do I build a user's Supplementary dictionary?

3) I have configured SYLLOGRAPH to suit my printer (a Monomecan Tally MT80) but why does it occasionally come to a standstill and go off line when printing text? Printer cable is OK.

4) Are there any books covering the use of Dragon Disk Drives?

5) In the Dragon 64 (Supple-

ment book (page 8) there is a Keyboard Auto Repeat Facility. The pokes work, but when I use my disk drive the disk won't stop revolving why?

Only pressing RESET or switching the computer off will stop it. Is there another way of getting the facility on the 64 (ie 32K mode)?

G J Tuford  
32 Pool Court  
Plymouth  
Devonport  
SAS 22M

THANKS your questions in order.

## Losing memory with Dragon DOS

I HAVE recently purchased a Dragon 64 with Dragon Disk Drive, but I am having difficulty in using the extra 32K memory with Dragon DOS. Typing EXEC mainly sets up the standard operating system not DOS. How can the extra memory be used with DOS?

David Forgan  
50 Rectory Road  
Parslophurst  
Hants GU14 7NS

YOU CANNOT access the full 64K RAM and the cartridge area (where the DOS is stored) at the same time. Therefore, the DOS is not available in 64K mode. It is possible to write a machine

code routine which copies the Basic and DOS, from 32768 to 57344 into RAM in 64K mode. This gives you access to an extra 8K from 57344 onwards. This is not accessible from Basic, however, only by POKE and in machine code.

Such a transfer program is a simple loop to read from ROM and store in the corresponding RAM location. Writing to location 57344 puts you in ROM mode and writing to location 57344 puts you in RAM mode. It will be necessary to disable interrupts during the copy loop. Such a program is shown below.

(1) The problem with the SUPP dictionary supplied with the Sylograph disk is that it is an empty file, and this is what is causing the error with the Spellchecker. To stop the error occurring you must have at least one entry in this file.

(2) The SUPP dictionary is a simple text file stored in the 57T directory. You can use Sylograph to create one, there should be one word per line.

(3) I cannot see any reason for this — perhaps your printer is at fault.

(4) I do not know of any books that concentrate on the Dragon disk drives, although there is certainly a need for one, judging by the number of questions regarding these we get.

(5) The auto repeat pokes reset the interrupt routine to the Dragons Basic ROM. The Disk ROM uses interrupts to control the motor off delay, and this is why the disk motor never stops. If you must use these pokes, you can type POKE 57344,0 to stop the disk drive at any time.

OROC	+255	Disable IRQ's
LDX	+32768	Start of ROM mode
LDSP STA	57344	Get byte from ROM
LDX	0	RAM mode

# RETURN OF THE RING

THE RING  
OF  
DARKNESS  
PART II

At last the saga  
continues...

The Guardian of Shadr is defeated, the hell spawned hordes of the Evil Sage lie at bay. Now Ringbearer, wielder of the Four Bright Rings, must face the greatest challenge to return the Ring Of Darkness to its creators on the hidden planet Ringworld... And somewhere at the ends of time the forces of evil are preparing their revenge.

After one year of development, Wintersoft are proud to present the most sophisticated game ever created for the Dragon 32. Written 100% in machine code, RETURN OF THE RING is an astounding multi program blend of superb high resolution colour graphics and advanced routines that allow you to communicate with your computer in complete sentences. You will face challenge and excitement as you and your Ringworld companions travel a mysterious planet and brave the dangers of an amazing three dimensional forest maze. An epic adventure unrivalled for its wealth of detail and diversity.

May luck travel your  
path.

Please note: RETURN OF  
THE RING is a complete  
adventure. You need not  
buy THE RING OF  
DARKNESS to play it.

# INCENTIVE

FOLLOWING THE EXEMPLARY BACKTRACK—INCENTIVE NOW PRESENTS FOR THE DRAGON

# THE KET TRILOGY

BY JOHN MARTIN AND RICHARD MCCORMACK

## \* THE KET TRILOGY – THE CELEBRATED ADVENTURE CLASSIC \*

### THE STORY SO FAR...

The Lords of Ket run a strife-torn land where magic and mayhem are common place. Raiders from the east sweep in and devastate the countryside, spared by the villainous Prince King Vran Vornol, and misuse of the cult of evil druids, and the betrayal, though utterly evil, Priestess Delpha.

Unjustly condemned for a murder you did not commit, you have been offered the chance of escaping the hangman's noose by undertaking a perilous quest. Naturally you accept, but to ensure your loyalty to the cause, the Lords have placed a magic incantation upon your neck, ordered to sink he possesses himself into you at the slightest sign of cowardice.

Perched at the brink of the unknown village, you stand alone with the daunting mission before you. With just a handful of coins, your trusty sword and the will to succeed.

Your task is to travel beyond the mountains and then underground via Vran's Temple to the ultimate confrontation with Vran himself, penetrating his inner sanctum, beyond the Guardians of the Gates.

**THE THREE BOOK ADVENTURES  
TOGETHER FORMING THE  
CLASSIC AND COLossal  
KET TRILOGY**

**MOUNTAINS OF KET**

**TEMPLE OF VRAN**

**THE FINAL MISSION**

**THE KET TRILOGY** for several platforms was available from selected Software Dealers nationwide. However, due to the popularity of the game and the excellent mail order service, **INCENTIVE** has decided to launch the **KET TRILOGY** ADVENTURE in the UK exclusively for postal order, independently of the computer.

**INCENTIVE** is offering a 100% discount, leaving just 499p **TRADE AND ON-DISK CASE** (includes 100% discount on the 100% discount).
